Alur Saif Ali Khan

Integrated M.Tech Student in Software Engineering | Applicant, 2027 Off-cycle Internship – Group Finance
+91-9059926982 | saif.22mis7009@vitapstudent.ac.in | LinkedIn | GitHub | Portfolio | Guntakal, India

PROFESSIONAL SUMMARY

Software engineering student (7.96 / 10 CGPA, graduating 2027) with a Python and Java foundation, working with live data through REST APIs, and a strong interest in the financial industry. Analytical, detail-oriented problem solver who enjoys testing and debugging to get things right, and is keen to apply programming skills to process automation and data-driven reporting in a finance team. Outcome-driven, with strong communication and teamwork skills.

EDUCATION

Integrated M.Tech in Software Engineering (5-year), Vellore Institute of Technology, Amaravati *2022 – 2027 | 7.96 / 10 CGPA*
Higher Secondary / Intermediate, Narayana Junior College, Guntakal *2019 – 2021 | 87%*
Secondary School, Narayana Group of Schools, Guntakal *2015 – 2019 | 96%*

INTERNSHIP

Web Development Virtual Internship, Bharat Intern LLP *Jul 10, 2024 – Aug 10, 2024*
AICTE Verified | Certificate of Completion issued August 24, 2024

- **Program Completion:** Successfully completed the Virtual Internship Program in Web Development as an active participant.

SELECTED PROJECTS

SecureVault: Distributed File Storage and Management System
End-to-End Encryption, TLS, 3x Replication, Role-Based Access Control

- **Secure Storage:** Built a distributed file storage and management system that protects files with end-to-end encryption and TLS-secured communication.
- **Replication:** Keeps 3x replicas of stored data across the distributed system for availability and reliability.
- **Access Control:** Enforces role-based access control so users can only access files permitted for their role.

Weather-RNN: Hourly Temperature Prediction
Machine Learning, Deep Learning, RNN, GRU, LSTM

- **Hourly Forecasting:** Predicts hourly temperatures for a specific location using machine learning and deep learning models, especially Recurrent Neural Networks such as GRU and LSTM.
- **Automated Pipeline:** Automates model training and prediction to deliver accurate short-term weather forecasts, improving on the delays and inaccuracies of traditional methods.

Weather Forecasting Application
HTML, CSS, JavaScript, OpenWeather API

- **Real-Time Data Reporting:** Developed a responsive web app that retrieves and presents real-time data (temperature, humidity, wind speed) for global locations.
- **API Integration:** Integrated a third-party REST API to automatically fetch and display live updates, removing the need for manual lookups.

TECHNICAL SKILLS

Programming & Automation: Python, Java, JavaScript, HTML, CSS

Data & APIs: REST API Integration, Real-Time Data Retrieval, DBMS, Web Development

Analytical & Quality Skills: Problem Solving, Debugging, Testing, Code Reviews, Competitive Coding

Core Coursework: DBMS, DSA, Object-Oriented Programming, Java Programming, Operating Systems (OS), Computer Networks (CN)

Soft Skills: Communication, Teamwork, Outcome-Driven Mindset

Spoken Languages: Urdu (Native), Telugu (Native), English (Professional Proficiency), Hindi (Conversational)
